An illustration on a dark grey background. A medical syringe with a grey plunger and needle is filled with red liquid containing small white bubbles. A black cable is connected to the bottom of the syringe and loops around to connect to the top of a black smartphone. The smartphone screen is lit up and shows a glowing white DNA double helix on the left side. To the right of the helix, there is a list of text in a light blue, monospaced font, resembling a genetic sequence or code. The overall theme is the intersection of medicine, technology, and genetics.

# TRANSFORMATICS + GENETICS
